**Remarks:** Sam--

I understand Amrom Katz of ACDA is briefing this paper to various agencies, including IC Staff and DoD. ACDA has apparently initiated a number of studies and some contracts have been let.

ACDA claims it has every right to act in this area because of its statutory responsibility for assuring the verifiability of arms control agreements.

It seems to me, however, that the approach ACDA is taking is way out of line with respect to the Intelligence Community and its management of intelligence relationships with foreign governments. It also impinges on the whole problem of centralized NSC control of MBFR matters.

I suggest you look into this and report to the Director if you think there is a real problem.

MEMORANDUM FOR: Deputy Director for Intelligence

Ed:

I thought that you should know about this. ACDA obviously is still trying to make it into the intelligence Big Time. [redacted] tells me that Amron Katz is briefing the pitch to various Agency's around town, including DIA. Danny reportedly thought it was a good idea. Is there anything you would like me to do?
